

شريكك المستدام لنموّك المالي

Your sustainable partner for Financial Growth

General Manager speech

Since our inception at Abdullah AlSaif Certified Public Accountants, my goal has been to build an entity that offers its clients more than just accounting services. I wanted it to be a reliable house of expertise, and a reference that grants confidence and adds real value to our clients' journey.

I believe that success is not measured by numbers alone, but by the ability to create a tangible impact on our clients' lives, and to help them make clearer financial decisions. This is the conviction from which I start with my team, as we always work with passion to elevate the quality of our accounting services and remain always in a position of trust.

While we are proud of what we have achieved so far, our ambition is greater, and our commitment continues to support the development journey in the Kingdom of Saudi Arabia by building long-term partnerships that enhance stability and drive growth.

Allah is the grantor of success...

Abdullah bin Mohammed AlSaif
General Manager

Our vision

To be the most trusted destination for establishments aspiring for safe and sustainable growth in the Kingdom of Saudi Arabia, by providing comprehensive accounting and consulting solutions, with the highest degrees of professionalism, and with a strategic perspective that supports their decisions.

Our Mission

We are committed to being the most trusted accounting partner in providing integrated accounting services for establishments and individuals, according to the professional standards adopted in the Kingdom of Saudi Arabia, through a specialized team distinguished by integrity and competence, to enable our clients to achieve stability, growth, and make financial decisions with confidence.

Our Values

Integrity

Speaking the truth and adhering to what is right without favoritism or bias while maintaining a decent manner.

Transparency

Complete clarity in dealing and disclosing relevant information.

Professionalism

Performing work with precise standards and high professionalism.

Commitment

Respecting appointments and covenants and delivering at the agreed time appropriate for the approved service time.

Responsibility

Bearing the results of work and achieving a positive impact towards the client and the profession.

Excellence

Continuous endeavor to offer the best we have, and exceeding expectations.

Workflow

01

Understanding the Need

Meeting with the client to understand their activity ,need and determining the scope of work.

02

Technical and Financial Proposal

Preparing a clear plan, determining the team and time, and submitting the technical and financial proposal.

03

Appointing a Project Manager

Determining a person in charge to lead the team, monitor quality, and ensure adherence to standards.

04

Team Formation and start of execution

Forming the team, distributing tasks, and starting work.

05

Support and Knowledge Support

Providing the team with guidelines and seeking the assistance of experts.

06

Periodic Reports

Submitting stage reports to discuss observations and update the operation status.

07

Final Report

Delivering the final output of the operation to the client and submitting it to relevant authorities if necessary.

Our Services

01 External Audit

Reviewing financial statements for all establishments in accordance with approved professional standards, expressing professional opinion thereon, and issuing audit reports.

02 Internal Audit, Governance and Risk

Executing internal audit tasks for all sections and departments in the establishment to evaluate the efficiency of procedures, organization, and associated matters, and submitting them to relevant parties with clear reports and practical recommendations.

03 Zakat and Tax Services

Providing services and consultations related to preparing and submitting Zakat and tax returns, objecting to them, and following up on their procedures starting from preparation up to final submission, as well as tax refunds.

04 Accounting Services

Performing the role of an accountant, chief accountant, or financial manager, recording financial events, and supervising the internal accounting team, ensuring the quality and accuracy of financial operations, and issuing periodic financial reports for presentation to the establishment's management.

05 Forensic Accounting

Preparing accurate and professional accounting reports for submission to judicial authorities such as courts, arbitration tribunals, labor or commercial committees, or others, and providing consultations of a financial or accounting nature.

06 Liquidation and Bankruptcy

Supervising the liquidation of legal entities pursuant to decisions of partners or judicial authorities, including asset inventory, settlement of liabilities, distribution of rights, and preparation of final statements.

We also handle statutory bankruptcy procedures according to the Saudi Bankruptcy Law, including preparing claims, representing creditors, submitting reports to courts, and coordinating with trustees.

07 Estates (Inheritance)

We handle estate management efficiently through preparing financial inventories, supervising asset valuation and liability analysis, then distributing financial shares among heirs according to relevant regulations.

We also provide detailed professional reports to judicial authorities when needed, ensuring transparency and contributing to preserving rights and facilitating judicial procedures.

08 Agreed-Upon Procedures Reports

Preparing accounting and technical reports upon the request of arbitration tribunals, competent authorities, or concerned parties, to cover specific purposes such as disputes, differences, embezzlements, and others.

09 Supervision of Off-Plan Sales Projects

Accounting supervision of real estate projects licensed under the off-plan sales system by approving disbursement documents, submitting periodic financial reports, and ensuring compliance with the requirements of relevant supervisory authorities.

10 Financial and Accounting Consulting

Studying accounting challenges facing establishments or individuals, providing specialized solutions, proposing policies and procedures, and contributing to developing the efficiency of the financial team.
